Screening Packages Overview

Complete multi-scan packages that provide a comprehensive cardiovascular picture in a single appointment.

WHY CHOOSE A PACKAGE?

Cardiovascular disease rarely affects just one system. Packages bundle the most clinically related scans into a single appointment — giving you and your physician a complete picture, not a partial one. All packages include a unified cardiologist report and results in 24–48 hours.

STROKE PREVENTION PACKAGE — \$697

Save \$97 vs. individual scans. Includes: Carotid Duplex with IMT + Echocardiogram.

Ideal for: Anyone concerned about stroke risk, atrial fibrillation, carotid disease, or cardiac embolism.

HEART FAILURE PACKAGE — \$1,097

Save \$94 vs. individual scans. Includes: Echocardiogram + Carotid Duplex with IMT + Lower Extremity Arterial.

Ideal for: Patients with shortness of breath, reduced exercise tolerance, leg swelling, or known cardiac dysfunction.

DIABETIC COMPLICATION PACKAGE — \$1,097

Save \$94 vs. individual scans. Includes: Carotid Duplex with IMT + Kidney Arterial Doppler + Lower Extremity Arterial.

Ideal for: Diabetic patients screening for the three most common vascular complications — carotid disease, renal artery stenosis, and peripheral artery disease.

COMPREHENSIVE VASCULAR PACKAGE — \$1,797

Save \$188 vs. individual scans. Includes: Carotid Duplex with IMT + AAA Screening + Kidney Arterial + Lower Extremity Venous DVT + Lower Extremity Arterial.

Ideal for: A complete evaluation of the body's major arterial and venous systems. Perfect for high-risk patients or those wanting maximum preventive information.

COMPREHENSIVE CARDIOVASCULAR PACKAGE — \$2,197

Save \$185 vs. individual scans. Includes all 6 modalities: Echocardiogram + Carotid Duplex with IMT + AAA Screening + Lower Extremity Venous DVT + Kidney Arterial + Lower Extremity Arterial.

Ideal for: The most thorough cardiovascular and vascular assessment available in a single visit. Recommended for high-risk patients, those with multiple risk factors, or anyone who wants the most complete picture of their cardiovascular health.
